EXPERIENCE

Coupa Software, Denver, CO — *Full Stack Software Engineer*

MAY 2022 - JUNE 2023

- Engineered and shipped new features, fixed bugs and developed tests for Coupa's travel product

- Worked within an agile development cycle to refactor legacy codebase (Backbone.js, Marrionette.js, CoffeeScript) into React/TypeScript using modern patterns and architecture.

- Lead flight search optimization project, owning all aspects from story creation and planning to implementation, testing, and deployment. Dramatically improved search result accuracy by refactoring api consumption logic.

- Integrated proprietary PCI tokenizer into payment system for Coupa Travel app, greatly improving user security.

- Enabled staged rollout of new product features by adding feature flags (LaunchDarkly) and monitoring (Datadog) to CI/CD workflows.

Max Reservations, Denver, CO — *Office Manager*

JULY 2018 - AUGUST 2021

- Regularly assessed office productivity and made team adjustments. Conducted interviews and hiring and training new office team members.

- Implemented and maintained company protocols to ensure smooth daily activities including processing and submitting of payroll.

EDUCATION

Western Governors University, Remote — *B.S., Computer Science*

*In Progress

Turing School of Software and Design, Denver, CO — *Frontend Web Development Certificate*

- Intensive frontend software engineering program (ACCET)/1500 hours over 7 months
- Collaborated on 4 paired/group projects and created 5 solo projects
- Built frontend accessible web applications using OOP, React, Router, Express, Hooks, HTML5, SASS, Cypress, TDD, Fetch API

University of California, Los Angeles, Los Angeles, CA — *B.A., English Language and Literature*
